FUNCTIONS INTRODUCTIONS

Main Functions

- 4 DMX channels .
- Automatic, sound active, 32 units via master/slave mode .
- Built-in 23 actions, run speed and strobe speed can be adjusted .
- With static colors, strobe, dimmer, color mixing and changing effects .

Operation Instructions

Power supply connecting:

Two sockets in the product, Power In and Power Out , the product can be supplied power by the power out. Maximum output power of the socket is 480W .

Set parameter in the Action Mode

1. Power on until it resets ok and press Up or Down to display Act.
2. Press Enter and then press UP or Down to choose which kind of action mode you need.
3. Press Enter and then press UP or Down for adjustment , press Enter to the next parameter when there are many parameters .
4. Press Mode to exit .

Note: Digital means the parameters.

Axxx action mode.

Fxxx Flash Speed, F=000 no flash, F=100 Flash by sound.

Pxxx Run Speed, P=000 Stop running P=50 Fastest speed P=051-100 Sound Active.

A021 Digital means functions :

P000-P100, Red

F000-F100, Green

C000-C100, Blue

Set parameter in the System Setup mode:

1. Power on until it resets ok and press Up or Down to display SYS .
2. Press Enter and then press UP or Down to choose which kind of parameter you need.
3. Press Enter and then press UP or Down to adjust .
4. Press Mode to exit .

Note :

When display S DAD and press Enter to set up DMX value .

When display S AAD and press Enter to display 8888, it resets ok with all light on.

5. Factory parameter Settings

With the factory parameter setting function, users can go back the factory parameter setting after adjusting by pressing the button of Mode for five seconds or so.

Functions for Action mode and system setup mode:

MODE	FUNC	PROGRAM	FUNTION/PROGRAM	(P)RUN SPEED	(F) FLASH SPEED	(C) COLOR		
ACT	A 000	000	Blackout					
		001	Red		000 – 100

220 – 229	Color Fade		Fade speed 0-100%			
230 – 255	Auto Run (sound active only)					

Note: CH1 DMX Value is 080-209, 230-255, CH2 000-127 for auto run speed, 128-255 for sound active with music, auto display without music.

MAINTENANCE

The unit should be cleaned periodically to ensure the optimum performance, the smudginess can decrease the life of light and the output of light is affected by the dust which can make the machine overheating. In general, make the maintenance at least two times a month. Be sure to power off the unit before cleaning .

Do not clean until the unit recovers normal temperature since high temperature for using, use the lens tissue or soft cotton cloth with alcohol to wipe gently.

Cleaning frequency depends on the environment in which the fixture operates, damp, smoky or dirty surrounding can cause greater accumulation of dirt on the optics. Never rub or press strongly on the panel.

SPECIFICATION

Voltage..... 100-240V AC 50/60Hz
